Dear Customer,

Congratulations on your decision to purchase the most reliable heating and cooling equipment. We are so confident in our product performance that we back it with the Broan Quality Pledge:

*If the **Compressor** in your Broan outdoor cooling/heat pump unit fails to operate during the first ten years of ownership (one year for models designated by the prefix ES(*), ET(*), G*, JS(*), JT(*), NS(*), NT(*)), under normal use and due to a defect in materials or workmanship, NORDYNE will replace the entire outdoor unit. A labor fee up to $250 will be paid to the service company to replace the failed piece of above listed equipment. You are responsible for the balance of all labor charges.

If the **Heat Exchanger** in your Broan package gas/electric unit or furnace fails to operate during the first ten years of ownership (one year for models designated by the prefix KG7*), under normal use and due to a defect in materials or workmanship, NORDYNE will replace the package gas/electric unit or furnace. A labor fee up to $250 will be paid to the service company to replace the failed piece of above listed equipment. You are responsible for the balance of all labor charges.

Pre-authorization and return of the defective unit are required.

**Exclusions:**

This Quality Pledge limited warranty must be registered within 60 days of the installation or occupancy. If registration is not completed within 60 days, the Quality Pledge reverts to 1 year, except for models designated by the prefix ES(*), ET(*), G*, JS(*), JT(*), NS(*), NT(*) for which there will be no Quality Pledge if you do not register within this time frame.

If it is a split system unit, it must be installed at the same time as the Broan manufactured and matched coil or air handler. The warranty period for the new unit continues from the original installation date of the previous unit.

The residence must be an owner-occupied, single family dwelling (apartment complexes are not covered under the Quality Pledge.)

*Note: In the year 2010, air conditioning equipment will no longer be available with R-22 refrigerant. At that time an outdoor condensing unit replacement will require a system that is compatible with R-410A, the new refrigerant. The indoor evaporator coil and connecting line set will have to be replaced. The homeowner will be responsible for the expense of replacing the evaporator coil and line set. In lieu of replacing the evaporator coil and line set, the homeowner can elect to receive a new R-22 replacement compressor if available.
